EXPERIENCE / PROJECTS

E-Commerce Website - Mernstack Project

E-Commerce Website for Clothing Brand (with Admin Panel) : [Link]

- Implemented secure **authentication** for both users and admins using MongoDB.
- Customers can **browse products**, add items to cart, and proceed to checkout with Razorpay **integration** or Cash on Delivery options.
- **Automated discounts** and shipping charges applied at checkout.
- **Admin panel** allows product management (add/remove clothing items) and provides a complete order **tracking system**: order placed → *packed → shipped → out for delivery → delivered.*
- **Integrated Cloudinary** for product image storage and optimized media handling.
- Users can view **real-time** order status updates in their profile section.

Chat-App Website - Mernstack Project

A real-time chat app with the following features : [Link]

- **User authentication system** for sign-up/login, ensuring **secure access.**
- Chat UI with sidebar showing users and their online/offline status, enhancing **real-time** communication.
- menu with options for Profile, Themes (via **DaisyUI**), and Logout, improving **usability** and user **experience**.
- **Profile management** – users can update their name and profile picture; email and join date remain unchanged.
- Supports text messaging and image sharing (uploads handled with **Cloudinary**).
- Any registered user can see and chat with others, encouraging open collaboration. (not private chat restricted).
- **MongoDB** is used for storing authentication, messages, and profile data efficiently.
- DaisyUI integrated for clean and **customizable** UI themes. improving usability and visual appeal.

Admin-Dashboard - React frontend

Frontend Admin-dashboard mainly Focused in Practice : [Link]

Developed a dynamic Admin Dashboard frontend in React with Material UI, Formik, and Nivo charts, integrating responsive layouts, interactive UI elements, and smooth routing—improving usability, data visualization, and overall efficiency while accelerating development momentum.

Portfolio Website - Next.js 15 Frontend : [Link]

Built a **fully responsive personal portfolio** using **Next.js 15**, showcasing projects and skills with smooth animations via Framer Motion and GSAP, interactive hover effects, and a functional contact form using Formspree. Leveraged Tailwind CSS for styling and AI-assisted development to streamline workflow and enhance user exp.
